

ALIGNED WITH OMAN AI & DIGITAL FUTURE PROGRAM (2024-2026)

AI Employees & **Lightweight ERP Systems** for Omani Retail SMEs

Eliminating operational friction, stockouts, fragmented messaging orders, and blind-spot decision-making through modular AI agents and cloud data pipelines built for urban retail leaders across Muscat and Oman.

The Omani SME Transformation Opportunity: Urgency & Vision

Oman's urban retail landscape is expanding rapidly, yet small and medium enterprises remain constrained by legacy tools, isolated data, and critical talent shortages. Tadbeer bridges this gap with autonomous AI employees wired directly into lightweight operational backbones.

MARKET MOMENTUM

Expanding Retail Pie

Oman's retail sector is projected to reach **\$21.65B by 2034** (7.2% CAGR), while e-commerce will double from **\$0.85B in 2026 to \$1.59B by 2031**. Small retailers are sitting in a booming market but operate on fragile manual systems.

THE STRUCTURAL BOTTLENECK

Fragmented SME Operations

Local studies confirm Omani SMEs suffer from siloed systems, resource limits, and digital talent shortages. While larger enterprises adopt corporate software, SMEs require fast, lightweight, intelligent tools.

01. INVENTORY & STOCK CONTROL

Manual stocktaking, inaccurate billing, rush high-price reorders, and cash locked in dead stock.

02. SOCIAL COMMERCE CHAOS

Orders split across POS, WhatsApp chats, Instagram DMs, and Excel spreadsheets causing lost sales.

03. BLIND DECISION MAKING

Owners running multi-million OMR operations by intuition without daily margins, stock risks, or cash visibility.

National Alignment: AI & Digital Future Program (2024–2026)

Tadbeer's solution architecture directly supports Oman's national directive to localize advanced digital technologies, automate commercial workflows, and elevate SME competitiveness without heavy capital expenditure.

Traditional Enterprise Software

- Expensive multi-month ERP implementations
- Complex dashboards requiring data analysts
- High staff resistance & slow adoption

Tadbeer AI Employee + Lightweight ERP

- Deployed in 2–4 weeks via Supabase & Cloud POS
- WhatsApp-native AI agents that explain decisions
- 100% Arabic & English multi-lingual workflows

7 Core Problem Domains & High-Leverage AI Solutions

We attack the 7 most painful operational bottlenecks in Omani urban retail with specialized AI agents wired into cloud data pipelines.

1 POS, Inventory & Stock Control

Pain: Peak period billing delays, inaccurate inventory, intuitive over-stocking, dead stock, and cash locked in slow-moving SKUs.

Cloud POS Spine: Arabic/English, offline-tolerant, integrated with local receipt printers & payment terminals.

AI Inventory Employee: Virtual stock controller that monitors sell-through, generates automated purchase orders, and sends daily WhatsApp digests to owners.

2 Omni-Channel & Social Commerce

Pain: Disconnected WhatsApp/Instagram sales, double-sold stock, price inconsistencies across physical & digital storefronts.

RetailOps Router: Single order hub unifying POS, Shopify/Woo, WhatsApp & Instagram DMs into one pipeline.

AI Sales Assistant: Chat agents on WhatsApp/Instagram that verify live inventory, take orders, process payments, and push delivery tasks.

3 Customer Data & Loyalty

Pain: Customer data trapped in POS receipts, zero personalized marketing, reliance on manual discount spams.

Micro-CDP & AI Segmentation: Ingests receipt & chat data into a single customer profile, auto-segmenting VIPs & lapsed buyers.

AI Marketing Employee: Generates targeted WhatsApp/SMS broadcasts and manages app-free punch-card loyalty logic.

4 Owner Visibility & Decision Support

Pain: Store owners juggling bank statements & gut feel; unable to calculate true margins or expansion readiness.

Founder Cockpit: Real-time visual dashboards showing gross margins, cash cycle, and channel performance.

Conversational AI CFO: On-demand WhatsApp chat assistant that answers complex business questions and simulates financial scenarios.

5 Procurement & Supplier Cash Control

Pain: Phone/WhatsApp purchasing chaos, supplier price variance, and cash trapped in wrong stock allocations.

Supplier Portal & AI Purchasing Agent: Automated PO generation balancing lead times with liquidity, enforcing strict cash discipline rules.

6 Staff Productivity & Training

Pain: High staff turnover, digital skill gaps, misuse of POS systems, and constant training overhead for owners.

AI Floor Manager: Instant WhatsApp/Kiosk assistant walking staff through system steps & delivering contextual micro-learning lessons.

7 Payments & Regulatory Compliance

Pain: Missing CBO digital fee waiver benefits, reconciliation delays, and evolving VAT compliance overhead.

Payment Orchestration Layer: Unified view of digital transfers, fee settlements, and automated AI compliance guidance.

5 Productized Turnkey Solution Bundles

Modular engagement options designed to solve specific operational pain points immediately and scale modularly.

BUNDLE 01

RetailOps Core

Cloud POS setup + Unified Stock Inventory + AI Stock Controller Agent + Daily Founder WhatsApp Digest.

Target: Fashion, Electronics & Cafes facing stockouts

BUNDLE 02

Social Commerce Engine

Order Router + WhatsApp/IG AI Sales Agents + Live Stock Check + Automated Fulfillment Tracking.

Target: Boutiques & Retailers with high DM volume

BUNDLE 03

Customer Brain

Micro-CDP + AI Customer Segmentation + Automated WhatsApp Broadcasts + Loyalty Logic.

Target: Multi-branch chains driving repeat sales

BUNDLE 04

Owner Cockpit & AI CFO

Real-time Margin Dashboards + Scenario Simulator + Conversational AI CFO on WhatsApp.

Target: Growth-minded founders expanding outlets

Technical Architecture & Deployment Roadmap

Tadbeer builds on modern, ultra-reliable cloud infrastructure designed for zero downtime, lightning speed, and effortless mobile accessibility.

THE TADBEER TECHNOLOGY STACK

Cloud POS & Devices

Offline-tolerant POS,
Bluetooth printers,
payment terminals.

Supabase Database

PostgreSQL engine storing
receipts, inventory &
customer CDPs.

AI Employee Engine

LLM agents executing
inventory, marketing &
sales workflows.

**WhatsApp &
Dashboards**

Conversational interface
for staff & visual cockpits
for owners.

Proven Deployment Methodology: Pilot → Validate → Scale

Phase 1: Discovery

Workflow & SOP audit,
POS evaluation,
inventory mapping.

**Phase 2: Pilot
Showroom**

Deploy POS spine & AI
Stock Employee in 1
flagship location.

Phase 3: Validation

Measure stock accuracy,
sales speed, and owner
time saved.

Phase 4: Full Scale

Roll out across all branch
locations in Oman &
Dubai.
