Common Challenges: **Why Retailers Stop Growing**

Many fragrance brands have great products but struggle with operations that slow down their sales and lower their profits.

BOTTLENECK 01

Unowned Social Storefronts

Relying 100% on manual Instagram DMs and phone calls without an owned e-commerce website or centralized customer database.

- ✗ No structured catalog with SKUs, pricing, or reviews
- ✗ High customer drop-off due to manual DM delays
- ✗ Founder tied down in repetitive manual product description links

Risk: Total reliance on social algorithms & lost sales leads

BOTTLENECK 02

Prestige Erosion via Heavy Discounts

Depending constantly on "50% Off" discount promotions to drive sales, eroding brand value and sacrificing profit margins.

- ✗ Commoditizing luxury perfumes into discount offers
- ✗ Slashing profit margins on international brand decants
- ✗ Training customers to only purchase when discounts are active

Risk: Low profit margins & training buyers to wait for sales

BOTTLENECK 03

Zero Customer Retention Systems

Lacking an automated CRM or loyalty program to re-engage buyers for Eid, National Day, birthdays, and seasonal fragrance gifting.

- ✗ No record of customer scent preferences or past purchases
- ✗ Zero automated WhatsApp broadcasts for seasonal gifting
- ✗ High customer churn rates after first perfume purchase completes

Risk: High customer acquisition costs & zero repeat LTV

BOTTLENECK 04

Manual Order & Inventory Friction

Handling orders, decant pricing, and stock tracking manually on paper or chat, causing billing delays and inventory mismatches.

- ✗ Stockouts on fast-selling perfume 10L decant stock
- ✗ Manual invoice creation & payment tracking delays
- ✗ Errors in customer shipping details during chat transcription

Risk: Stockouts, lost orders & staff processing bottlenecks
